

C Programming Language

#Project - 11

Write a program in C language. The program will read and write file and fill a structure type. The file contains disorganized details about people. You should read properly for every person's detail, and write properly. And you have to write a file like that:

ID	NAME	SIR NAME	MAIL
05122018	Ozgu	GOKSU	ogoksu@gtu.edu.tr

- You should use functions for every purpose. For example; `readFile(FILE *file)`, `writeFile(FILE *file)`, etc.
- You should use structure which contains name, sir name, ID, e-mail.
- You should put all details about people in structures.
- You can use "Disordered.txt" as a file to read.
- You should create a new ordered file.
